## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-3 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 1, lines 5-7 recites the limitation "a tap weight update calculation unit coupled to the equalizer and adapted to determine *constant* and predetermined tap weight updates for use in adjusting the tap weights during operation of the equalizer". This limitation is not disclosed in the disclosure of the instant application. As illustrations shown in figures 2 and 3, the "tap weight update calculation unit" is adapted to determine adaptive "tap weight updates", namely, the "tap weight updates" being non-constant "tap weight updates". The limitation is suggested to be changed to --a tap weight update calculation unit coupled to the equalizer and adapted to determine *adaptive* tap weight updates for use in adjusting the tap weights during operation of the equalizer--.

Claims, depended on claim 1, therefore, also rejected.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2611

4. Claims 1-3 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 5 recites the limitation "a tap weight update calculation unit coupled to the equalizer". It is unclear whether the input of the "tap weight update calculation unit" is coupled to the input or output of the "equalizer" or whether the output of the "tap weight update calculation unit" is coupled to the input or output of the "equalizer". The limitation is suggested to be changed to --a tap weight update calculation unit *having an input coupled to the output of the equalizer*--.

Similarly, claim 3, lines 1-3 recites the limitation "a demodulator *coupled to the equalizer*". The limitation is suggested to be changed to --a demodulator *having an input coupled to the output of the equalizer*--.

Similarly, claim 12, line 5 recites the limitation "a demodulator *coupled to the equalizer*". The limitation is suggested to be changed to --a demodulator *having an input coupled to the output of the equalizer*--.

Claims, depended on claim 1, are therefore also rejected.

***Allowable Subject Matter***

5. Claims 14-16 are allowed.

6. Claim 12 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Art Unit: 2611
